As a user, after reseting the password which failed, we see the following screen and the error message: "Dieser Link ist leider ungültig. Klicken Sie auf "Passwort vergessen", um einen neuen Link zu erhalten."

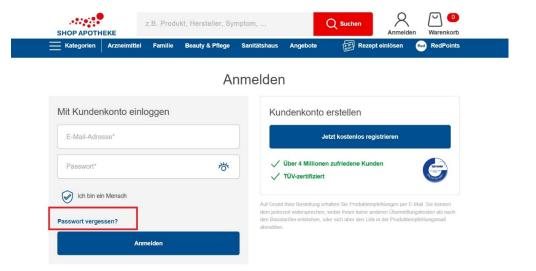

It could be confusing for the user to see this error message that says click on the "Passwort vergessen" when there is no button "Passwort vergessen".

What could be improved here would be to put the link "Passwort vergessen?" on the same page so that the user does not need to go back to previous page, to click on "Anmelden" button.

After clicking on "Passwort vergessen", inserting empty/no email, the message that email is sent is shown

- 1. Open the following link: https://www.shop-apotheke.com/nx/login/
- 2. Click on "Password vergessen"

3. Do not insert anything on email the address filed

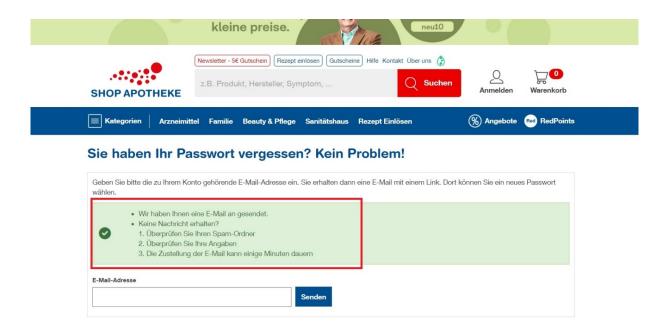

4. Click on "Senden"

EXPECTED RESULT:

- Error message that email needs to be inserted shall be shown

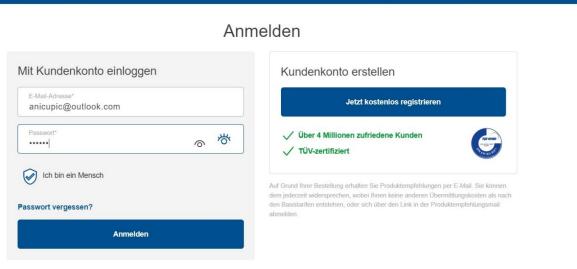

ACTUAL RESULT:

- Message comes that email is sent

Minor bug on Microsoft Edge version: Version 106.0.1370.47 – two eye symbolsare shown on the password field

To be clarified: if too many wrong login attempts (uthe user.	sing correct email and wrong	g password) shall block
